Evaluator's Estimate

E. SESSION SUMMARY:

The target involves a structure which is part of an organization for the manufacture and production of materials. This structure is a building with steps in front, and long and wide concrete walk ways or run ways, extending from it in different directions. This facility consists of a lot of metal and metal scraps on the inside and is both raised above and below ground in its foundation. The concept of sound is significant to this site. A low but loud intermittent humming noise is present. Many working class workers are currently working here in plain uniform. Adjacent to this building, is a large, deep dug out land area. This area may be under construction because there are unfinished structural walls creating this space. In other words, a high land area is at the edge of a steep dug out hole or cavern. There is a relationship

to money and resources that have been provided to this project for large metallic material production. Big trucks are utilized for loading and off-loading. Steel drums can be found on the premises containing liquid. The production of large metallic materials is the result of work efforts from this location.

3 FEB 92

MEMO FOR: CH, ODT-S

SUBJECT: PROJECT 92-4-0(U)

1. (S/NF) The target appears to be a structure allied with the concepts of storage and manufacturing. The target building is located in an isolated area. Soil excavation and movement also appears associated with the target. Two sources associated the target with the odors and tastes normally associated with that of toxic materials.

2. (U) The isolation of the site implies a sense of illegality and secrecy.
